Problem 9

Start:

Input: Array of ints

Process: convert array into a set, removes duplicates

Process: create var cur_num = 1

current num = 1

Process: while cur_num is in the set

add one to cur_num

if cur_num = 1:

output: return cur_num # returns the lowest num not in the set

else:

Problem 8

Start:

input: Array of ints, must be 0 or 1

Process: create variables East_count = 0 and passing_pairs = 0

Process: for each number in the array:

if the number is 0:

add 1 to east_count

else:

Add east_count to passing pairs

if passing_pairs > 1 Billion:

return -1
